Western Australian Office

WESTERN AUSTRALIA

INDUSTRIAL ACCIDENTS (Series B)

1962-63

NOTE: The statistics contained in this Bulletin have been compiled from reports of workers' compensation claims closed during the year ended 30th June, 1963 in respect of accidents causing death, or absence from work for one week or more.

This Bulletin has been prepared to provide figures which are comparable with those for other Australian States which do not compile statistics of industrial accidents involving absence from work for less than one week.

An earlier Bulletin (S.B. 11/65) "Industrial Accidents (Series A)" issued 8th February, 1965, contains corresponding information for industrial accidents causing absence from work for one day or more.

PERTH, Western Australia.
11th March, 1965.

R. J. LITTLE,
Deputy Commonwealth Statistician
and Government Statistician.

INDUSTRIAL ACCIDENTS

INTRODUCTION

The collection of information for detailed analyses of industrial accidents in Western Australia commenced on 1st July, 1961, from which date all insurers and self-insurers have been required to submit a report to the Workers' Compensation Board in respect of each claim for workers' compensation as soon as the claim is closed.

For the purposes of the collection each claim for workers' compensation is regarded as a separate industrial accident and the statistics contained in this Bulletin have been prepared from reports of claims closed during the year ended 30th June, 1963. The "Cost of Claims" shown in the several tables is not limited to amounts actually paid during 1962-63 (or 1961-62), but represents all payments made (i.e. from the date of the injury) in respect of each claim closed during that year. "Time Lost" is to be interpreted similarly.

Only accidents coming within the scope of the Workers' Compensation Act are included and consequently industrial accidents to self-employed persons, and all Commonwealth Government employees, are excluded. With few exceptions, an accident to an employee while travelling between his home and place of employment was not compensable in Western Australia until the 14th December, 1964, when the Workers' Compensation Act Amendment Act of 1964 came into operation. From that date, the compensation provisions have been extended generally to include injuries sustained in the course of travel between place of residence and place of employment.

The industry groups shown are according to the 1961 Census Classification of Industries.

The concept of "accident factor" as used in the preparation of the relevant tables has been - "That underlying agency, other than human failing, which appears to contribute most materially to an accident and which would be most likely to receive attention in preventing the occurrence of a similar accident".

To enable comparison with industrial accident statistics of other Australian States, the scope of this bulletin has been restricted to include only compensated work injuries causing death, or absence from work for ONE WEEK OR MORE. In this context a week is interpreted as a week of five working days. The additional time lost and cost of reopened claims have been included in the tables but these cases have not been included in the number of accidents. Disease cases have been excluded entirely.

More detailed statistics than those published in this bulletin are available for inspection at the Commonwealth Bureau of Census and Statistics, Perth.

No. 1 - FATAL AND NON-FATAL ACCIDENTS IN INDUSTRY GROUPS, SHOWING TIME LOST AND COST OF CLAIMS, 1962-63

A - TOTAL PERSONS
